

Date		Speaker	Seminar Title	Seminar Description
October 9, 2019		<p>Johnathan Darrow, SJD, LL.M., JD, MBA Assistant Professor of Medicine Harvard Medical School/Brigham and Women's Hospital</p>	The Eight Unexpected Causes of High Drug Prices	<p>Patents are often considered the primary cause of high drug prices, and policy discussions have therefore focused primarily on a single aspect of the drug price issue: exclusivity. This 30 minute talk will explain why patents are unlikely to be the primary cause of rising drug prices and describe eight factors that should instead receive greater attention by scholars, the FDA, and Congress.</p> <p>Additional Reading 1 Additional Reading 2 Additional Reading 3 Additional Reading 4 Additional Reading 5</p>
